

RPET

PET is the most common type of plastic, mostly used for packaging and beverages disposable bottles/containers

RPET

PET is the most common type of plastic, mostly used for packaging and beverages disposable bottles/containers.

A large part of the solid waste in the world is attributed to this packaging. Recycled PET is known as RPET, and it is the most widely recycled plastic in the world. The use of recycled PET by giving a new life to an already made product in place of virgin resin results in reduced environmental impact.
